

ABOUT ME

Motivated Software Engineer with over 2.5 years of experience in mobile and web app development, assistive technology, and human–robot interfaces. Proficient in developing mobile applications using Python, Dart, and modern frameworks. Skilled in debugging, problem solving, and creating scalable, user-friendly solutions. Dedicated to continuous learning and delivering high-quality software products that improve accessibility and human interaction.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, Dart
- Frontend Development: HTML, CSS, Bootstrap
- Backend Development: Flask
- Database: Firebase
- Version Control: Git (clone, commit, push, pull)
- Tools & Platforms: Android Studio, Postman, Pytest, Figma, Canva
- Other Skills: Unit Testing, Debugging, Responsive UI Design

EXPERIENCE Software Engineer, HUTLABS (2024 – Present)

- Developed an HRI system for a coconut tree climbing robot to enable intuitive user interaction and control.
- Designed and implemented an assistive communication app integrating eye sign detection and text-to-speech functionality.
- Created biomedical mobile applications for motion and respiratory data monitoring.
- Supported bug fixing, version control, and feature optimization under team supervision.
- Contributed to GUI design for autonomous wheelchairs and service robots.
- Collaborated with cross-functional teams and followed quality coding standards for deployment.

Junior Developer Intern, TARTLABS (Feb 2023 – Nov 2023)

- Worked on UI development using HTML, CSS, JavaScript, and Bootstrap.
- Participated in debugging and feature testing for web interfaces under mentorship.
- Assisted in optimizing front-end layouts and ensuring cross-browser compatibility.

EDUCATION

- B.Tech in Information Technology – Rathinam Technical Campus
- HSC & SSLC – Sri Shanthi Vijai Girls Hr. Sec. School

PROJECTS & PUBLICATIONS (Under Review)

- Netra Mobile App: Eye Sign Recognition Performance and Robustness
- Wireless Human–Robot Interaction: Coconut Tree Climbing and Harvesting Robot
- Real-Time Motion Monitoring App: For Remote Rehabilitation
- Respiratory Data Monitoring App: NodeMCU

CORE COMPETENCIES

- Problem Solving & Debugging
- Adaptability & Learning Agility
- Collaboration & Teamwork
- Compassionate and Ethical Work Approach
- Strong Communication & Documentation
